## **COMPREHENSIVE NEEDS ASSESSMENT (CNA)**

## Overarching Wonderings to keep in mind as you develop your CNA:

- Where is the school now? Does the comprehensive needs assessment include an analysis of multiple sources and types of data (e.g., demographic data, perceptual data, school process data, and student learning data)? Is the needs assessment comprehensive? Does the needs assessment include a look across the four types of data?
- O How did the school get to where they are? After looking across all data elements, and determining the school's greatest challenges, what are the contributing causes of low student achievement?
- Where does the school want to be? What is the school's Mission and Vision? Is the vision spelled out, so everyone on staff can understand it in the same way?
- O How does the school plan to get to where they want to be? What are the identified strategic actions and enabling activities to achieve the Mission and Vision? How will the school address the contributing causes of low student achievement or sustain the strengths?
- O How will the school know if what they are doing is making a difference? How will the school measure progress to determine effectiveness?
- Is there alignment between the Comprehensive Needs Assessment (CNA), Academic Plan (AP), and Expenditures?

### WHERE IS THE SCHOOL NOW: What does the data say?

### Demographic Data - Who are we?

(e.g., Trend Reports, SSIR, Strive HI, LDS reports - attendance; discipline; enrollment; characteristics of the students, staff, and community; etc.). Consider look fors among various populations: students, community, parents, teachers, and administration.

#### Reflective Questions to keep in mind:

How has the enrollment in the school changed over the past three years? What percentage of the school is in the high needs group? How has the high needs students changed over the past three years? Is chronic absenteeism a challenge? Is there a pattern of high absenteeism for specific student population? Intersecting data: What are the differences in student achievement results because of attitudes related to whom students have as teachers? Is there a relationship between attendance and standardized achievement growth? Do students who attend school every day perform better on the state assessment than students who miss school for more than ten or more days?

### Summary of Data/List of Data Sources: (LDS)

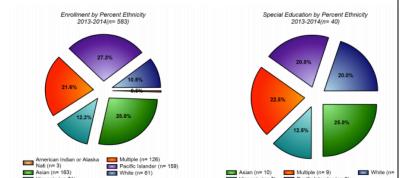

|                         | 2013-14 | 12.3.2014 |
|-------------------------|---------|-----------|
| Year end enrollment     | 583     | 649       |
| Attendance              | 94.8%   | 96%       |
| Discipline Offenses     | 114     |           |
| Suspension Count        | 1       |           |
| Low SES                 | 40.0%   | 42%       |
| Students w/Disabilities | 6.9%    | 6.6%      |
| English Lang Learners   | 8.4%    | 9.7%      |

| Student Ethnicity                | 2013-14 | 2014-15 |
|----------------------------------|---------|---------|
| American Indian or Alaska Native | 0.5%    |         |
| Asian                            | 28.0%   |         |
| Hispanic                         | 12.2%   |         |

## Summary of Analysis of data:

### **DEMOGRAPHIC DATA Implications for developing the academic plan:**

## Perceptual Data - How do we do business?

(e.g., SQS, Tripod survey, parent/community surveys, student surveys, staff surveys, interviews, etc.)

#### Reflective Questions to keep in mind:

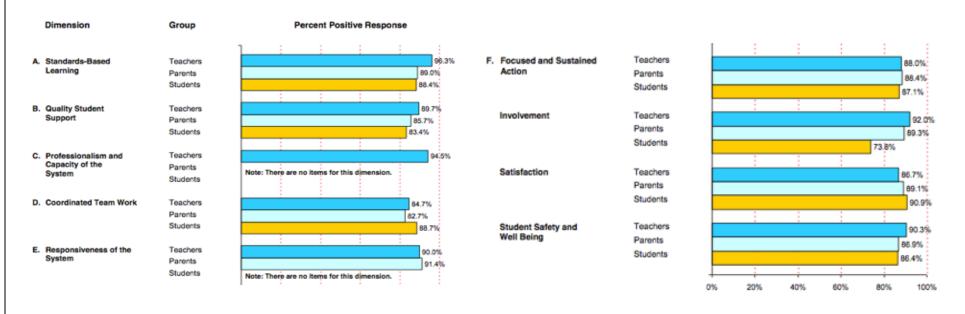

Are the students who are getting the best grades also reporting satisfaction with the learning environment? How do students, parents, staff, administration, and/or community perceive the learning environment? Are there differences in how students perceive the learning environment, based on: Whom they have as teachers? The students' participation in different programs?

Summary of Data and List of Data Sources: SQS – Spring 2014, Tripod – Spring 2014 (Elementary and Early Elementary)

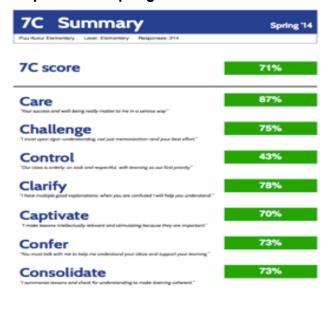

#### School survey size and return rate:

**SQS Data - Spring 2014-2015** 

| Group     | #<br>Distributed | #<br>Returned | Return rate<br>(%) |
|-----------|------------------|---------------|--------------------|
| Teachers: | 27               | 25            | 92.6%              |
| Parents   | 152              | 47            | 30.9%              |
| Students: | 152              | 140           | 92.1%              |

## Tripod Data - Spring 2014-2015

### Care - Elementary 3-5

## Student Learning Data – How are the students doing?

(e.g., Strive HI Reports, HSA Reports, ACT, WIDA, Universal Screeners, School Wide Assessments, Program Assessments, report card grades, etc.)

#### Reflective Questions to keep in mind:

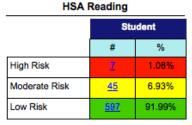

Which achievement, growth or gap index received less than 5% of the points? Is it the same indicator for each grade level tested? What indicator is identified as the major area of need? In which grade level(s)?

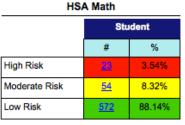

How did the high needs students perform on the state assessment? Looking at the trend over the past years, is there growth in proficiency attainment for each of the high needs group? Are some groups of students doing better than others? Are the grade levels or departments making greater progress? Intercepting data: How have students in the ethnicity groups scored on the state assessment? Is there a difference in student achievement results by program participation? By co-curricular programs? What are the difference in student learning results based on who the students are and how they are taught to learn? What are the difference in the result we are getting, based on whom we have as students and how they are taught? How would they prefer to learn? Are we utilizing program models that will ensure students' long-term academic achievement?

### School Processes Data – How are effective are our processes?

(e.g., School Leadership, Governance, Organization, Communication, Programs, Culture & Environment, Monitoring & Accountability, Standards Based Education, Assessment, the Decision Making Process, School Improvement Process, Professional Development Plan, Programs, RTI, etc.

#### Reflective Questions to keep in mind:

What are the instructional strategies used by the teachers in reading? In math? What are the instructional strategies used by the teachers when a student doesn't learn? Over the past two-three years, have there been any significant changes in the programs? Is there school-wide implementation of CCSS? Is there instructional coherence? How are decisions made? Is decision-making inclusive? Are decisions data-driven? Is the school plan based on thorough analysis and incorporation of prioritized findings from a comprehensive needs assessment? Does the plan consist of strategies, activities, people responsible, due dates, timelines and resources needed to be addressed to implement and achieve the vision and goals and to eliminate the contributing causes of the gaps or enhancing successful practices? Is the school safe, clean, healthy, orderly place that nurtures learning? Is the culture characterized by trust, care, professionalism, and high expectations for all students? What information triggers a request for services outside of the classrooms? For ELL? For SPED? What programs are operating in the school this year? How effective is our RTI system? Have we fully developed all three Tiers in the RTI system?
